WORK EXPERIENCE

Software Development Associate

Niyalo

Apr 2024 - February 2025

- Designed and built scalable, distributed systems to power responsive applications, ensuring fault tolerance and low-latency performance.
- Developed user-friendly interfaces with optimized algorithms for seamless functionality and cross-platform compatibility.
- Integrated APIs and implemented secure authentication mechanisms to enhance system security and usability.

Developer Associate

Swift Game Dev

July 2023 - April 2024

- Engineered scalable backend systems for games using C# in Unity and GDScript in Godot, optimizing distributed computing processes.
- Developed real-time WebSocket communication for multiplayer interactions, ensuring high-performance client-server synchronization.
- Designed and implemented efficient algorithms to optimize game logic, improving overall system responsiveness.
- Integrated third-party APIs and built robust query systems to enhance game functionalities and streamline data processing.

PERSONAL PROJECTS

Object Detection(YOLOv8)

- Developed an object detection model identifying indigenous Nepali items from images/videos using YOLOv8 and Flask.
- Achieved 88%+ accuracy through optimized training and model tuning.

SMS (Student Management System)

- Built a Student Management System implementing MVC and DAO for structured HTTP requests.
- Ensured modular design for easy scalability and maintainability.

Android Weather App

- Developed an Android weather app using Java and OpenWeather API for real-time forecasts.
- Designed a structured data model for efficient weather representation.

Commux (Group Chat Portal)

- Created a real-time group chat system with Ajax for dynamic updates.
- Enabled unique group codes for secure and seamless group access.

Match Prediction

- Trained a Premier League match prediction model using scraped data on formations, venues, and teams.
- Deployed predictions via a Django-based web app.

Password Manager

- Developed a Django-based password manager with secure credential storage.
- Used hashing techniques to enhance data security.

Eccom (E-commerce)

- Built a scalable e-commerce platform with an admin dashboard for category and product management.
- Integrated Stripe API for secure online payments.

File Compression

- Implemented Huffman coding for .txt file compression, reducing size by 90% with no data loss.
- Used SQL database for storing and retrieving compressed data.

EDUCATION

Bachelor's in Computer Application

Tribhuvan University DAV College (2019-2023)

SKILLS

Programming: Java, C#, Python, JavaScript, HTML/CSS, SQL, Node.js, React.js, .NET, ASP.NET, Php, Laravel, SQL, NoSQL, Spring Boot, Django

Tools: Android Studio, IntelliJ, PyCharm, Visual Studio, Jupyter Notebooks, Git, Bootstrap, Docker, Unity, Godot
